

MUHAMAD INSAN TAUFIK

Software QA Engineer | Manual Testing, Test Automation & API, Data & BI Validation

West Jakarta, Indonesia | insantaufik82@gmail.com | linkedin.com/in/muhamad-insan-taufik | github.com/InsanTaufik
insantaufik.github.io/Website_Portofolio

PROFESSIONAL SUMMARY

ISTQB Certified (CTFL v4.0) Software QA Engineer with hands-on experience testing web, Android, iOS/iPadOS, and embedded BI applications across Banking, Capital Markets, Automotive, and FMCG domains. Experienced in functional, integration, regression, smoke, SIT, UAT, and release validation, with API and backend investigation using Postman and network log analysis. Applies SQL and Python/Pandas to large-scale data validation, and executes and maintains inherited automated regression suites in Playwright (JavaScript) and WebdriverIO/Appium while collaborating with Developers, Business Analysts, and Product teams across Agile delivery.

TECHNICAL SKILLS

Testing & QA: Functional Testing, End-to-End Testing, Integration Testing, Regression Testing, Smoke & Sanity Testing, SIT, UAT, Release Validation, Test Case Design, Defect Management, Agile Scrum

Web & Mobile: Cross-Browser Web Testing, Android, iOS/iPadOS, Cross-Device & Responsive Testing, Embedded Power BI Testing

API & Backend: REST API Testing, Postman, JSON & HTTP Response Validation, Authentication/Authorization Testing, Network Log Analysis, JMeter (basic)

Test Automation: Playwright (JavaScript), WebdriverIO/Appium, Tricentis Tosca, Katalon Studio (Groovy), Page Object Model, Custom Fixtures, Allure Reporting, Jira/Xray Integration

Database & Data: SQL, Python/Pandas, Data Reconciliation, ETL/Migration Testing, Google BigQuery, Microsoft Fabric, Cloudera (Impala/Hive)

Programming & Tools: JavaScript, Python, SQL, Groovy, Java, Git, Jira

PROFESSIONAL EXPERIENCE

Software QA Engineer - PT Astra International Tbk (via PT Global Lancesoft Indonesia)

Apr 2026 - Present

- Validated 100+ enterprise tables (1B+ rows) in a Microsoft Fabric/Cloudera (Impala/Hive) to Google BigQuery migration, comparing row counts, schema and data type mapping, NULLs, duplicates, business keys, and numeric, datetime, and timezone precision through SQL and Python/Pandas reconciliation, achieving 99.8% row-level hash match across partitioned datasets.
- Executed functional, integration, regression, smoke, SIT, UAT, and release validation for Auto Intelligence, an enterprise BI application embedding Power BI reports, across Web, Android, iOS, and iPadOS; designed 200+ test cases covering authentication/authorization, hierarchical slicers, filter-state persistence, and responsive rendering on 15+ dashboards.
- Execute and maintain inherited Playwright (Web) and WebdriverIO/Appium (Android) regression suites built on Page Object Model, custom fixtures, role- and environment-based test data, and Allure/Jira-Xray reporting, investigating failures and surfacing reliability improvements such as condition-based waits and resilient locators.
- Investigated API and backend issues using Postman and network log analysis, isolating authorization failures and report-loading defects; documented 35+ defects in Jira with full reproduction evidence, driving confirmation and release validation across 3 release cycles.

Quality Assurance Intern - PT IDX Solusi Teknologi Informasi

Dec 2025 - Apr 2026

- Authored and executed 80+ functional and regression test cases for IDX Terminal and HRIS, deriving positive and negative scenarios from functional requirements; groomed PRDs with Developers, Business Analysts, and UI/UX Designers to surface ambiguous requirements before development.

Quality Assurance Intern - PT Indivara Group

Nov 2025 - Dec 2025

- Designed and executed 100+ functional and regression test cases across an Android app, a CMS, and a Salesforce platform, identifying 7 critical pre-production defects; tracked 20+ defects in Jira using Gherkin-based acceptance criteria across 4 Agile sprints.

Business Support QA & Testing Intern - PT Bank Tabungan Negara (Persero) Tbk

Jun 2024 - Aug 2024

- Created and executed 60+ API and regression test cases for a Corporate Internet Banking platform across 10+ transaction types; built and maintained 25+ Tricentis Tosca automation modules supporting recurring regression cycles.

PROJECTS

Java/Selenium Automation Framework - Java, Maven, TestNG, Selenium (personal project): Built a test automation framework from scratch to learn professional framework architecture, including thread-safe parallel execution, constructor injection, and a polymorphic browser interface for cross-browser support.

Invoice Management API Automation - Katalon Studio, Groovy, REST API: Developed an automated API validation suite for authentication, invoice listing, invoice detail, and unbilled summary endpoints, with positive and negative scenarios for HTTP status codes and JSON payloads. Implemented reusable request and retry handling through Custom Keywords, and delivered workflow documentation.

EDUCATION & CERTIFICATIONS

Bachelor of Information Systems - Telkom University | GPA: 3.68/4.00

Sep 2021 - Aug 2025

ISTQB Certified Tester Foundation Level (CTFL) v4.0 · Associate Data Scientist (BNSP) · Languages: Indonesian (Native), English (Professional Working)
