SUMMARY

Software QA Engineer combining web, mobile and API testing with data quality validation in SQL, Python/Pandas and SAP GUI Scripting. Validated a 1B+ row Fabric/Cloudera-to-BigQuery migration and is building SAP-to-A1 customer data validation automation at PT Astra International Tbk. Prior QA internships in banking and capital markets.

EXPERIENCE

Product QA / Software QA Engineer, PT Astra International Tbk (client) Apr 2026 – Present
Assigned through PT Global Lancesoft Indonesia

Data quality & cross-system validation: SAP to A1 (Azure SQL); Fabric / Cloudera to BigQuery

- **SAP GUI & A1 customer data validation (in progress):** Developing SAP GUI Scripting (VBScript) automation to extract customer data from SAP tables KNA1, KNB1 and ZPYGSDDT00816, and Python/Pandas automation to compare it with A1 (Azure SQL) on unique CustomerNo, using batched extraction, flexible SAP-to-A1 field mapping and raw vs cleaned matching to detect record-count, duplicate, missing-record, null/blank and field-level discrepancies.
- Reconciled SAP Excel extracts against A1 with SQL and Python; investigated ~1,000 remaining UAT discrepancies.
- **MAGNUM – enterprise data migration QA:** Validated Fabric / Cloudera (Impala, Hive) to Google BigQuery migration across five business units (100+ tables, 1B+ rows); used SQL and multithreaded Python/Pandas for row counts, schemas, NULLs, duplicates, business keys and numeric/date-time precision; applied SHA-2 row-level hashing (99.8% row match).
- Investigated billed customers still shown as White tier in A1 (tier rules across CustomerProfileCDP and Segments) and the CustomerCDP-to-Elasticsearch flow; recommended Data Transport logging and supported Kafka checks.

Application QA & automation: ODYSSEUS / Auto Intelligence (web, Android, iOS, iPadOS)

- Executed functional, SIT, UAT, release and regression testing of Auto Intelligence, an enterprise BI app embedding Power BI reports; designed 200+ test cases on 15+ dashboards covering authentication/authorization, APIs, dashboard data, hierarchical slicers, filter persistence and responsive behavior.
- Investigated authorization failures and report-loading defects with Postman, network inspection and application logs; documented reproducible defects in Jira and validated fixes across 3 release cycles.
- Maintained and contributed to inherited Playwright (JavaScript, web) and WebdriverIO/Appium (Android) suites on Page Object Model; investigated failures and identified reliability fixes (condition-based waits, resilient locators).
- **Power BI Embedded validation (in progress):** Developing and refining Python/Pandas logic to compare source Excel datasets with embedded Power BI dashboards (Current Month, Back Date, Matched, Full DP, Discount, Cash, Credit).

Quality Assurance Intern, PT IDX Solusi Teknologi Informasi Dec 2025 – Apr 2026

- Tested IDX Terminal, KPEI PME/SBL, KPEI Administration, HRIS and SSL/SFTP modules; wrote and ran 80+ functional and regression test cases from PRDs, FSDs and backlogs; found 6 functional defects in IDX Terminal after backend changes; supported retests and UAT.

Quality Assurance Intern, PT Indivara Group Nov 2025 – Dec 2025

- Designed and executed 100+ functional and regression test cases for an Android app, a CMS and Salesforce; found 7 critical pre-production defects and tracked 20+ in Jira against Gherkin criteria over 4 Agile sprints.

Business Support QA & Testing Intern, PT Bank Tabungan Negara (Persero) Tbk Jun 2024 – Aug 2024

- Built and maintained 25+ Tricentis Tosca automation modules for recurring regression cycles on a corporate internet banking platform; created and executed 60+ API and regression test cases across 10+ transaction types.

PROJECTS

Java/Selenium Automation Framework (personal project) · Java, Selenium, TestNG, Maven

- Built from scratch: thread-safe parallel execution, constructor injection, polymorphic cross-browser interface.

Invoice Management API Automation · Katalon Studio, Groovy, REST API

- Automated positive/negative tests for authentication, invoice list/detail and unbilled-summary endpoints (status codes, JSON payloads); built reusable request and retry Custom Keywords.

TECHNICAL SKILLS

Testing	Functional, integration, regression, end-to-end, smoke, SIT, UAT, release validation, Jira/Xray
Automation	Playwright (JavaScript/TypeScript), WebdriverIO/Appium, SAP GUI Scripting (VBScript), Tricentis Tosca, Page Object Model, Allure, Git; project work: Selenium (Java, TestNG, Maven), Katalon Studio (Groovy)
API	REST APIs, Postman, HTTP status and JSON validation, authentication/authorization, network logs
Data & BI	SQL, Python (Pandas), data quality validation, cross-system reconciliation, migration testing, Google BigQuery, Azure SQL, Microsoft Fabric, Cloudera (Impala, Hive), Power BI Embedded; basic exposure: Elasticsearch, Kafka

EDUCATION & CERTIFICATIONS

Bachelor of Information Systems, Telkom University · GPA 3.68/4.00 Sep 2021 – Aug 2025
Certifications: ISTQB Certified Tester Foundation Level (CTFL) v4.0 · Associate Data Scientist (BNSP)
Languages: Indonesian (native) · English (professional working proficiency)
