PROFESSIONAL SUMMARY

ISTQB Certified (CTFL v4.0) QA Engineer and Information Systems graduate with hands-on experience across Banking, Capital Markets, Automotive, FMCG, and Business Intelligence platforms. Validated 100+ enterprise datasets and 600+ test cases across functional, API, web, mobile, embedded BI, SIT, UAT, and regression testing, with strong SQL and Python/Pandas skills for large-scale data validation and test automation. Proven ability to investigate defects, perform root cause analysis, and collaborate with cross-functional teams to ensure high-quality software releases.

TECHNICAL SKILLS

Testing & QA: Functional Testing, Regression Testing, API Testing, Mobile Testing, Web Testing, Embedded BI Testing, ETL/Data Validation Testing, UAT, Test Case Design, Defect Management, Root Cause Analysis

Automation & Tools: Selenium, Playwright, Postman, Tricentis Tosca, JMeter, Jira, Git, Gherkin (BDD)

Programming & Database: SQL, Python, JavaScript, Java, TypeScript

Data & BI Platforms: Google Cloud Platform, Microsoft Fabric, Cloudera, Microsoft Power BI (Embedded)

Methodologies: Agile Scrum, SDLC, STLC

PROFESSIONAL EXPERIENCE

Product Quality Assurance - PT Astra International Tbk

Apr 2026 – Present

- Validated 100+ enterprise datasets across five business units during a Microsoft Fabric and Cloudera to Google BigQuery migration, achieving 99.8% row-level hash match accuracy using SQL reconciliation and Python/Pandas automation.
- Maintained 40+ Playwright JavaScript automation scripts for the Auto Intelligence App, reducing flaky test failures by 30% through root-cause fixes and test data updates.
- Applied partition-based validation logic across transactional datasets with up to 1+ billion rows of data, resolving schema mismatches and duplicate records that reduced data discrepancies by 25% and cut validation query runtime by 40%.
- Tested 15+ embedded Power BI dashboards within the Auto Intelligence Sales Operations platform across Web, Android, and iOS in DEV, STG, and Prod-like environments.
- Performed SIT, UAT, regression, functional, and integration testing across 200+ test cases, covering API integrations, authorization flows, report rendering, filters, slicers, refresh, and navigation.
- Identified and documented 35+ defects in Jira related to dashboard loading performance and API dependencies, each with reproduction steps, expected/actual results, and root cause analysis.
- Collaborated with data engineers, backend engineers, Business Analysts, and external vendors to drive defect resolution, retesting, and release validation across 3 release cycles.

Quality Assurance Intern - PT IDX Solusi Teknologi Informasi

Dec 2025 – Apr 2026

- Authored and ran 80+ functional and regression test cases for IDX Terminal and HRIS, covering positive and negative scenarios derived from functional requirements.
- Groomed PRDs with developers, Business Analysts, and UI/UX Designers, reducing ambiguous and redundant requirements by up to 50% before development.
- Identified six functional defects and performed defect validation, regression, and UAT across Agile sprints using traceable test scenarios.

Quality Assurance Intern - PT Indivara Group

Nov 2025 – Dec 2025

- Developed and performed 100+ functional and regression test cases across Bersama App (Android), Bersama Web Monitoring (CMS), and Victory Web (Salesforce), identifying 7 critical defects before production release.
- Tracked and closed 20+ defects in Jira using Gherkin-based acceptance criteria, collaborating with Product Owners, Developers, and DevOps Engineers across 4 Agile sprints.

Business Support QA & Testing Intern - PT Bank Tabungan Negara (Persero) Tbk

Jun 2024 – Aug 2024

- Created and validated 60+ regression and API test cases for Corporate Internet Banking, covering backend services and business rules across 10+ banking transaction types.
- Built and maintained 25+ Tricentis Tosca automation modules, reducing manual regression effort by 80% per recurring test cycle.

EDUCATION

Bachelor of Information Systems - Telkom University | GPA: 3.68/4.00

Sep 2021 – Aug 2025

CERTIFICATIONS & LANGUAGES

ISTQB Certified Tester Foundation Level (CTFL) v4.0 Course · Associate Data Scientist (BNSP) · HackerRank: Python, SQL, Java (Basic)
Languages: Indonesian (Native), English (Professional Working Proficiency)

PROJECTS

Sales & Inventory Forecasting System - Python, XGBoost, SQL, Streamlit: Built an end-to-end ML pipeline (preprocessing, feature engineering, validation, prediction) achieving $R^2 = 0.901$ and $MAPE < 10\%$, deployed as an interactive Streamlit app for business users.
